ADRIANO CELENTANO
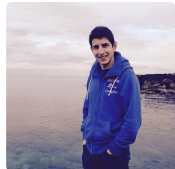

DevOps Engineer with a fervent enthusiasm for software development

☎ 07716 532750
✉ adriano8899@gmail.com
📍 Chesham, Buckinghamshire

Enthusiastic engineer with a strong focus on Linux-based systems, boasting a decade of expertise in conceptualizing and managing applications for businesses of varying sizes. Recognized for developing resilient, scalable systems that prioritize user-friendliness and ease of maintenance.

WORK EXPERIENCE

Senior DevOps Engineer   Medispend | 2022 - 2023

Collaborated closely with the business on various strategic initiatives, including Microsoft 365 Security enhancements, internal tool development, architecture migration, cost optimization, and global platform expansion

- Microsoft 365 Security
- Internal tool development
- Architecture migration
- Cost reduction

DevOps Engineer   Realistic Games | 2021 - 2022

Dedicated to spearheading platform modernization and providing steadfast support. Successfully introduced Kubernetes and multi-cloud capabilities to enhance operational efficiency

- Re-Architecture to Kubernetes
- Development of internal tooling
- Implementation of automated systems providing GitOps capabilities for Kubernetes (ArgoCD)
- Cost Optimisation

DevOps Engineer   Vive (GH Bank) | November 2020 - July 2021

Specialized engineer in cloud-based technologies and automation, dedicated to establishing a robust infrastructure for a novel digital bank. Led initiatives to revamp deployment systems, ensuring seamless CI/CD capabilities while prioritizing security

- Implementation of secure cloud native architecture
- Development of internal tooling
- Implementation of automated systems providing GitOps capabilities for Kubernetes and AWS
- Cost Optimisation
- Development of CI/CD platform for Spring based microservices

DevOps Engineer   Metro Bank | August 2020 - November 2020

I became a member of the Metro team with the specific objective of enhancing the automated administration platform and playing a key role in a comprehensive IT modernization endeavor.

- Cloud Architecture
- Automation to assist in the deployment of infrastructure
- Develop internal tooling to facilitate internal requirements
- Development of automated systems to reduce toil

Linux Engineer | DevOps Engineer   Rackspace | November 2011 - November 2020

Offered comprehensive assistance to both internal and external clients, addressing a diverse range of solutions, including but not limited to LAMP, LNMP, and Cloud Computing.

- Cloud Architecture
- On-Premise Architecture
- Mentorship of junior engineers
- Develop automation for Rackers to use on customer servers
- Development of automated systems to reduce toil

EDUCATION

Bachelor's Computer Science
Kingston University
2008 - 2011

BTEC Software Development (level 2 & 3)
West Thames College
2004 - 2006

CERTIFICATIONS

RedHat Certified Administrator
March 2012

SKILLS

Cloud
Amazon Web Services

Programming
Python

Automation
Ansible
